

CANDIDATE-001

Sydney, Australia | candidate001@email.com | +61 2 XXXX XXXX

SUMMARY

Experienced backend engineer with 5 years building scalable Node.js services. Specializing in REST API design, database optimization, and cloud infrastructure. Strong track record deploying high-traffic applications on AWS.

EXPERIENCE

Senior Backend Engineer | TechVenture Labs | Sydney, AU | 2022–Present

- Led design and implementation of microservices architecture handling 2M+ daily requests
- Optimized PostgreSQL queries, reducing API latency by 40%
- Mentored 3 junior developers; established REST API best practices
- Tech: Node.js, Express, TypeScript, PostgreSQL, AWS (EC2, RDS, Lambda), Docker

Backend Engineer | StreamCo Digital | Sydney, AU | 2019–2022

- Built real-time data pipeline processing streaming analytics for 500+ clients
- Designed and maintained 15+ REST endpoints handling payment processing
- Managed CI/CD pipelines using GitHub Actions and AWS CodeDeploy
- Tech: Node.js, JavaScript, MySQL, Git, REST APIs, AWS

Junior Backend Developer | Pixel Solutions | Brisbane, AU | 2018–2019

- Developed backend services for e-commerce platform serving 100K users
- Collaborated with frontend team on API contracts and documentation
- Tech: Node.js, Express, SQLite, Git

EDUCATION

Bachelor of Science in Computer Science | University of Sydney | 2018

SKILLS

Languages: JavaScript, TypeScript, Python

Backend: Node.js, Express, REST APIs, Microservices

Databases: PostgreSQL, MySQL, database indexing & optimization

Cloud: AWS (5 years), Docker, Kubernetes basics

DevOps: Git, GitHub, CI/CD pipelines, Linux

Other: API design, GraphQL fundamentals, performance optimization
