

CANDIDATE-003

Singapore | candidate003@email.com | +65 XXXX XXXX

SUMMARY

Backend engineer with 6 years in enterprise software development. Proven expertise in designing robust, scalable systems. Strong in REST API development, database architecture, and cloud deployment strategies.

EXPERIENCE

Senior Backend Engineer | Quantum Systems Asia | Singapore | 2021–Present

- Designed and built microservices platform processing 10M+ events daily
- Led database migration from MySQL to PostgreSQL, improving performance 50%
- Managed deployment infrastructure across AWS and Azure
- Mentored team of 4 engineers on backend best practices
- Tech: Node.js, TypeScript, PostgreSQL, Azure, Kubernetes, Docker

Backend Engineer | Enterprise Solutions Ltd | Singapore | 2018–2021

- Built REST APIs for large-scale B2B platform with 200+ enterprise clients
- Implemented caching strategy using Redis, reducing server load by 45%
- Maintained 99.99% uptime SLA for critical payment systems
- Tech: Node.js, Express, MySQL, AWS, Git, REST APIs

Developer | StartupHub Singapore | Singapore | 2017–2018

- Early hire at SaaS startup; built initial backend infrastructure
- Designed database schema handling 1M+ user records
- Tech: Node.js, JavaScript, PostgreSQL, heroku

EDUCATION

Bachelor of Science in Information Technology | Nanyang Technological University | 2017

SKILLS

Languages: JavaScript, TypeScript, Java, Python

Backend: Node.js, Express, REST APIs, microservices architecture

Databases: PostgreSQL, MySQL, Redis, database design & optimization

Cloud: AWS (6 years), Azure (3 years), Kubernetes

DevOps: Git, Docker, CI/CD, monitoring

Other: API gateway patterns, caching strategies, system design
