PROFESSIONAL SUMMARY

Recent Information Technology graduate with strong academic and project-based software development experience. Comfortable with Python, Flask, React and Git, but has limited professional software development experience.

EDUCATION

Bachelor of Information Technology — Divine Word University, 2025

TECHNICAL SKILLS

Python — Used Python throughout university projects for approximately 2 years.

Web Development — Built web applications using Flask and React as part of final-year projects.

Version Control — Used Git and GitHub for university group projects.

Databases — Worked with MySQL for student projects.

PROFESSIONAL EXPERIENCE

IT Support Assistant — Island Business Services — 2025–Present

- Provide technical support and assist users with software and hardware issues.
- Work with the internal IT team to document incidents and resolve user requests.
- Have not yet held a dedicated professional software developer position.

PROJECTS

Inventory Management System — Built a Flask and React application with MySQL for a university capstone project.

Student Attendance Application — Developed a Python application for recording and reporting attendance.

COMMUNICATION & TEAMWORK

- Worked in a four-person university development team and presented the final project to academic and business reviewers.
- Regularly explain technical support issues to non-technical staff.
