PROFESSIONAL SUMMARY

IT and telecommunications engineer with 3 years of practical experience in network operations and digital television support. Strong foundation in IP networking, service monitoring, customer-premises equipment and technical troubleshooting. Interested in applying networking and systems knowledge to IPTV engineering, service reliability and video delivery.

EDUCATION

Diploma in Information and Communication Technology — National Technical College, Port Moresby | 2020–2022

KEY SKILLS

- TCP/IP networking and subnetting
- IPTV fundamentals and digital video services
- Basic multicast and IGMP concepts
- Cisco-style router and switch configuration
- Network monitoring and fault diagnosis
- Windows and Linux troubleshooting
- Set-top boxes, home gateways and ONT equipment
- Technical support, ticketing and customer communication

PROFESSIONAL EXPERIENCE

Telecommunications Network Technician — South Coast Telecom | 2023–Present

- Monitored network services and investigated connectivity and service-quality issues.
- Installed and configured customer routers, ONTs and set-top boxes for broadband and digital services.
- Performed connectivity tests and documented faults for escalation to engineering teams.
- Assisted with network changes, equipment replacement and service restoration.
- Supported customers with television service activation and common playback/connectivity problems.

ICT Support Technician — Port Moresby Business Systems | 2022–2023

- Provided desktop, network and user support for small and medium business customers.
- Configured switches, wireless access points and endpoint devices.
- Used basic packet and network diagnostic tools to troubleshoot connectivity issues.
- Maintained support tickets, asset records and technical documentation.
