PROFESSIONAL SUMMARY

IPTV and network support engineer with 4+ years of experience supporting IP-based television services, LAN/WAN infrastructure, streaming platforms, and customer-premises equipment. Experienced in troubleshooting multicast delivery, network connectivity, service outages, and IPTV middleware. Comfortable working with monitoring tools, routers, switches, and technical support teams.

EDUCATION

Bachelor of Information Technology — Pacific Technical University, Port Moresby | 2018–2021

KEY SKILLS

- IPTV service deployment and technical support
- IP multicast, IGMP, VLANs, TCP/IP and DNS
- Routers, switches, Wi-Fi and LAN/WAN troubleshooting
- Streaming protocols, video quality and service monitoring
- Linux and Windows administration
- Network diagnostics using Wireshark, ping, traceroute and SNMP
- Customer-premises equipment (STB, ONT and home routers)
- Incident management and technical documentation

PROFESSIONAL EXPERIENCE

IPTV Support Engineer — Pacific Digital Networks | 2022–Present

- Supported IPTV services, set-top boxes and customer connectivity across residential and business customers.
- Investigated video buffering, channel loss, authentication, multicast and network-related incidents.
- Configured VLANs, switches and customer routers and assisted with service provisioning.
- Used monitoring and packet-analysis tools to identify service degradation and recurring faults.
- Worked with network and operations teams during outages and service restoration.

Network Support Technician — Island Communications Ltd. | 2021–2022

- Provided first- and second-level support for LAN/WAN connectivity and customer equipment.
- Performed installation, testing and troubleshooting of routers, switches and access equipment.
- Maintained incident records and technical handover documentation.
